Re: Vanessa Lopez  
Dob: 05/06/1979

To Whom It May Concern:

Vanessa Lopez has been seeing me for counseling for Post Traumatic Stress Disorder resulting from physical violence and a forced abortion by her then boyfriend, a professional athlete, and his attorney. That relationship has ended, but since then she has been threatened by her boyfriend's family and his brother which has contributed to her stress.

Upon intake Vanessa exhibited a variety of symptoms including generalized anxiety, depression, crying spells, panic attacks, distressing and intrusive memories of traumatic events and frequent nightmares.

In the four counseling sessions she has attended in the past month, she has made a great deal of progress. She is able to talk about the events that occurred with much less anxiety. Her depression has lessened and she is crying much less. Her sleep is much better and in the past two weeks she has only had one nightmare. She made her way past the anniversary of the abortion and is grieving less since then.

Vanessa is motivated for treatment and participates fully in counseling. She is a strong woman and her long term prognosis is good.

If you have any further questions, I can be reached at 407-265-6100.

With warm regards,

Dr. Ann McDaniel

Vanessa-

I understand that you have completed the termination procedure. I was under the impression that a second trimester procedure was lengthy and involved an overnight stay. In any event, in connection with the agreement, please advise of when you and I may meet at the Women's Center to obtain the required medical records.

Greg
